

Testing your WebAssign Account

Before Monday 25th September you should have activated and tested your account.

WebAssign: <http://www.webassign.net/>

Under the 'assignments' that appear on your **HOME** page after login is:

[Chemistry 1B LogIn Test Fall 2016](#)

The LogIn Test is a simple example of the kinds of questions (objective, essay, and drawing) that will appear on actual homework assignments. Please 'take' the test and submit it. It will help the Chemistry 1B staff setup the grading system (and be assured that the grade for this will not be 'counted').
